

ShopEase — Customer Account Policy

Company: ShopEase	Effective Date: 01 September 2026
Document Type: Account Policy	Last Updated: 01 September 2026
Version: 1.0	Status: Active

1. Account Creation & Eligibility

To establish a ShopEase customer account, an individual must be at least 18 years of age (or have explicit parental/legal guardian supervision under Indian contract law) and possess a valid Indian mobile phone number capable of receiving SMS OTPs and an active email address.

REGISTRATION RULE

Rule: Each ShopEase account must be uniquely associated with one mobile number and one email address. Duplicate registration attempts using an existing verified mobile number will be redirected to account sign-in or password recovery.

2. Credential Verification & Security Standards

Email Verification: Upon registration, an automated activation link is dispatched to the specified email address. The link remains valid for 24 hours. Unverified emails will prompt a verification banner upon subsequent logins.

Phone Verification: A 6-digit One-Time Password (OTP) is sent via SMS. The OTP is valid for 10 minutes and expires automatically. A maximum of 3 OTP generation requests are permitted within any rolling 60-minute window to prevent automated abuse.

Password Complexity Requirements: Passwords must contain a minimum of 8 characters and include at least one uppercase letter (A-Z), one lowercase letter (a-z), one numeric digit (0-9), and one special symbol (e.g., @, #, \$, %, !). Passwords matching common dictionary words or personal phone numbers are rejected.

3. Account Modifications, Phone/Email Changes & Recovery

Customers can modify their profile details through the 'My Account > Security Settings' section:

- **Updating Mobile Number:** Changing the registered phone number requires dual-factor OTP validation sent simultaneously to the existing phone number and the proposed new phone number.
- **Updating Email Address:** Requires entering the current account password followed by clicking a cryptographic confirmation link sent to the new email address.
- **Account Recovery:** If a customer loses access to both their registered phone number and email address, they must initiate formal identity recovery through customer support (support@shopease.example). The user must supply past order IDs, registered address history, and government-issued photo identification.

4. Account Suspension, Deactivation & Permanent Erasure

- **Suspension:** ShopEase reserves the right to suspend accounts engaged in abusive return velocity, payment chargeback fraud, repeated abusive language toward support personnel, or automated bot scraping.

- **Temporary Deactivation:** Customers may temporarily deactivate their accounts from the user profile settings. While deactivated, order history and saved cards remain preserved, but promotional emails and public profile actions are silenced. Logging in with existing credentials instantly reactivates the account.
- **Permanent Account Deletion:** Under customer data privacy rights, users may submit a permanent account deletion request. The account enters a 30-day grace period during which the request can be cancelled. All pending orders, active returns, and open warranty claims must be fully completed before deletion processing can commence. After 30 days, personal data is irreversibly purged, except transaction records retained for statutory tax compliance.

5. Multiple Accounts & Guest Checkout Guidelines

Family members within the same physical household are permitted to maintain separate accounts. However, creating synthetic multiple accounts to exploit single-use introductory discounts (e.g. WELCOME100), referral bonuses, or bulk promotional coupons constitutes promotional fraud and will trigger account pooling or closure.

Guest Checkout: Users may place orders without creating a password-protected account by providing a delivery address, mobile number, and email. Guest orders can be tracked via SMS order links and may be converted into full registered accounts at any time by setting a password.

6. Account Scenarios & Practical Examples

EXAMPLE: FORGOTTEN CREDENTIALS WHILE TRAVELLING

Scenario: A customer is traveling and locked out of their SIM card while needing to check an order status.

Solution: The customer can use the 'Verify via Email' alternative on the login screen. An emergency login link is dispatched to their registered email address, allowing temporary authenticated access for 2 hours.

ABSOLUTE SECURITY MANDATE

ShopEase support staff will NEVER request: Password, OTP, CVV, Card PIN, Authentication codes. Any caller or email demanding these details is fraudulent and must be reported immediately.
