

ShopEase — Order Cancellation Policy

Company: ShopEase	Effective Date: 01 September 2026
Document Type: Cancellation Policy	Last Updated: 01 September 2026
Version: 1.0	Status: Active

1. Core Cancellation Rule & Eligibility

ShopEase provides a hassle-free, transparent cancellation framework designed to give customers maximum flexibility while ensuring efficient warehouse logistics.

AUTHORITATIVE CANCELLATION RULE

Rule: Customers can cancel an order free of charge before the order reaches 'Shipped' status. No cancellation fees, administrative deductions, or penalty charges apply to any order cancelled prior to shipment.

2. Order Lifecycle Stages & Cancellation Rules

The ability to cancel depends directly on the real-time operational status of the consignment:

Lifecycle Stage	Cancellation Permitted?	Operational Action & Fee
Order Placed / Confirmed	Yes (Instant)	1-click cancellation via user app/web dashboard. ₹0 fee.
Order Processing / Packed	Yes (Permitted)	Cancellation allowed in system before handover to logistics. ₹0 fee.
Shipped / In Transit	No (Directly)	Order has left fulfillment center. Customer must refuse delivery at doorstep.
Out for Delivery	No (Directly)	Customer informs courier to cancel and refuse physical delivery.
Delivered	No (Completed)	Order closed. Governed by 7 calendar days Return Policy.

3. Handling Cancellations After Shipment

Once an order transitions to 'Shipped' status, the consignment is in the physical custody of our third-party logistics courier network and its routing cannot be instantly halted via the user interface. In such situations:

- Doorstep Refusal:** When the delivery executive arrives or contacts you for delivery, inform them that you wish to cancel the order and decline acceptance.
- Return to Origin (RTO):** The courier updates the delivery status to 'Refused by Customer - RTO Initiated'.
- Automated Refund Trigger:** Upon physical return of the package to our fulfillment hub, a 100% refund is automatically released to your original payment method.

4. Partial, Seller, and System Auto-Cancellations

Partial Order Cancellation: If an order contains multiple distinct items, customers can cancel individual items independently before those specific items enter 'Shipped' status. Remaining uncanceled items proceed to fulfillment without interruption. Any pro-rated delivery or coupon threshold adjustments are recalculated automatically.

Seller-Initiated Cancellations: In rare instances where a merchant or fulfillment warehouse experiences a sudden stock discrepancy or quality-check failure prior to dispatch, ShopEase will immediately cancel the order, release a 100% refund within 24 hours, and credit a ₹100 apology shopping voucher to the customer account.

System Auto-Cancellations: Orders pending online payment verification for more than 15 minutes, or orders with unverifiable, incomplete delivery addresses that fail phone confirmation, will be automatically cancelled by the system.

5. Cancellation Refund Timelines & Practical Examples

When an order is cancelled prior to shipment, refund initiation is instantaneous. Funds reflect in the customer's account according to the standard banking schedule: UPI (24–48 hours), Wallets (24 hours), Cards (5–7 business days), Net Banking (3–5 business days).

PRACTICAL EXAMPLE: CANCELLING AFTER SHIPPING

Scenario: Customer orders a mixer grinder at 10:00 AM on Monday. By 4:00 PM Tuesday, the order status changes to 'Shipped'. At 5:00 PM Tuesday, the customer decides to cancel. Resolution: The customer cannot click 'Cancel' on the portal because dispatch has occurred. The customer refuses the package when the courier attempts delivery on Thursday. Once the courier marks the shipment as RTO, full refund is credited back via UPI within 24–48 hours.
