

ShopEase — Promotional Discount & Coupon Policy

Company: ShopEase	Effective Date: 01 September 2026
Document Type: Discount Policy	Last Updated: 01 September 2026
Version: 1.0	Status: Active

1. Promotional Discounts & Coupon Voucher Structure

ShopEase offers seasonal promotions, cart-level vouchers, and category-specific discounts to deliver enhanced shopping value to our customers across India. All currency denominations are expressed in Indian Rupees (INR, ₹).

Discount Type	Code Format / Trigger	Eligibility & Thresholds	Example Application
Welcome Coupon	WELCOME100	First-time registered users; MOV ₹999	Instant ₹100 flat discount off first order
Cart Threshold Voucher	FESTIVE200	Minimum Order Value (MOV) ₹1,999	Flat ₹200 off on cart totals ≥ ₹1,999
Mega Festive Saver	MEGA500	Minimum Order Value (MOV) ₹4,999	Flat ₹500 off on cart totals ≥ ₹4,999
Category Promotion	TECH10	Selected electronics & accessories	10% discount up to a maximum cap of ₹1,000

2. Authoritative Coupon Application Rules

ONE-COUPON-PER-ORDER MANDATE

Rule: Customers may apply exactly ONE promotional coupon code per order during checkout. Stacking multiple promotional coupon vouchers on a single cart is strictly prohibited.

COUPON + MEMBERSHIP DISCOUNT STACKING RULE

Rule: While multiple coupon vouchers cannot be combined together, an eligible promotional coupon CAN be stacked with an active ShopEase Membership tier discount (Plus 5% or Premium 10%). The tier discount is deducted first from eligible list prices, and the coupon code is subsequently applied to the resulting subtotal, provided the net value meets the Minimum Order Value (MOV) requirement.

3. Minimum Order Value (MOV), Expiration & Exclusions

Minimum Order Value (MOV): The MOV represents the net value of eligible merchandise required in the shopping basket before taxes and shipping fees are calculated. If an item is removed from the cart causing the subtotal to fall below the MOV, the coupon discount is automatically decoupled.

Promotional Expiration: All promotional coupons possess strict validity dates and times (evaluated in Indian Standard Time, IST). Expired coupon codes cannot be reactivated or extended by customer support personnel.

Category Exclusions: Unless explicitly indicated in special promotional terms, coupon discounts cannot be redeemed against the purchase of bullion (gold/silver coins), infant formula, digital gift cards, or ShopEase Plus/Premium membership subscriptions.

4. Cancellation & Refund Calculations on Discounted Orders

Refund Calculation Principle: In the event of a returned or cancelled discounted order, the refund credited to the customer corresponds strictly to the net amount actually paid out of pocket, never the gross Manufacturer's Recommended Price (MRP) or pre-discount retail value.

Restoration of Single-Use Coupons: If an entire order placed using a single-use coupon is cancelled prior to shipment (either by the customer or due to seller stockout), the coupon code is automatically reinstated and re-credited to the customer's account wallet within 2 hours, retaining its original validity period.

Partial Return Impact: If an order qualifies for a threshold discount (e.g. ₹200 off on ₹1,999 MOV) and a customer later returns one item such that the retained order value drops below ₹1,999, the ₹200 discount is forfeited and adjusted against the refund payable for the returned item.

5. Detailed Calculation Example

CALCULATION EXAMPLE: MEMBERSHIP + PROMOTIONAL COUPON

Scenario: A Premium member purchases a smartwatch listed at ₹3,000 and applies coupon FESTIVE200 (MOV ₹1,999). Step 1: Premium member gets 10% tier discount: $₹3,000 - ₹300 = ₹2,700$. Step 2: Subtotal ₹2,700 exceeds the MOV of ₹1,999. FESTIVE200 is successfully applied: $₹2,700 - ₹200 = ₹2,500$. Step 3: Premium member receives free shipping. Final checkout price paid: ₹2,500 (Total savings: ₹500).
